

# Neatflex™ – the ultimate material for curved surfaces

**45% less weight than regular MDF plus all the qualities of plywood**

## Neatflex Benefits

- Labour saving
- One piece frame construction
- Easy to construct frameless curves
- Suitable for heavy duty applications

## Neatflex Characteristics

- 19mm thick
- 1220 x 2440mm sheet – cross cut / cross grain
- Plywood face on an MDF Lite platform
- Full range of curves from 300mm radius
- 23 kg per sheet – 7.72 kg per sq.m.

*Neatflex has a unique construction that enables it to be quickly formed into strong, smooth custom curved surfaces with less weight than other techniques*

**Neatflex™ can be combined with itself,  
Neatform® Bendy MDF, plywood or laminate  
to create frameless free-form curves**

Neatflex™ is the speedy and simple way to make  
inspirational curved surfaces

19mm Neaflex:  
300mm  
minimum radius

9mm Neatform:  
150 to 200mm  
minimum radius

6mm Neatform:  
100 to 150mm  
minimum radius

*In addition  
to frameless  
techniques,  
Neatflex™ can  
be used with  
a traditional  
frame to create  
robust curves*
