

Perforated MDF

The expanded range of perforated MDF panels

the product

Neat Concepts Ltd have increased the range of Perforated MDF Panels. Unlike most similar products the range consists entirely of routed MDF panels giving cleaner edges and finer definition to the finished product. The routing process also allows greater flexibility and gives the opportunity to produce smaller quantities of special designs at realistic cost.

potential applications

Radiator Grills:

Easily fitted to standard or bespoke surrounds, these grills can be finished in a variety of ways for all environments.

Partitions and Screens:

Ideal for use in public areas to create divisions without completely enclosing a part of a restaurant, reception area, or office.

Board Design

Door Panels:

Perforated panels can be applied to doors, fabric backgrounds or mirrors to create diverse decorative effects. Alternatively, they can be used alone to provide ventilation where needed.

the standard range

The designs Helsinki, Oslo, Berlin, Lyon and Florence are held in stock in size 1830x610 (nominal) manufactured from 4mm thick sanded Medite MDF which conforms to EN622-1:Class A low formaldehyde type.

special products
